## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to bus bridge, classified in class 710, subclass 306.
- II. Claims 11-20, drawn to bus master/slave controlling, classified in class 710, subclass 110.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination(s) II is/are different embodiment(s) separately usable from the combination of invention I. The subcombination of Invention II has separate utility such as a slave device.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search for invention I is not required for invention II, restriction for examination purpose as indicated is proper.

Art Unit: 2182

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
